

It has been established in early research that **DMT** has a **neuroplastic effect** on the **brain**, which means it **creates new connections** with **neurons**. **Neurogenesis** is a **very important process** that **needs to happen** after an **injury**.

AGN is **preparing to launch** a **Phase 1 study** of **DMT** for the **treatment** of **stroke**.

There are **surprisingly few stroke treatments available** on the market today, which is why we are **very bullish** on **AGN**, especially at this **current market cap**.

AGN has a **low share count** and a **tight share structure**. There are **strong investors** behind this company including **AlphaNorth Asset Management**, which **increased** its **AGN stake** yesterday to **more than 13%**.

AGN is **awaiting approval** to be listed on the **NASDAQ**.

Algeron Pharmaceuticals (CSE: AGN) has only **2.354 million shares outstanding** for a **market cap** at **\$4.85 per share** of **CAD\$11.417 million** or **USD\$8.8 million!**

80%+ of stroke victims do not qualify for currently available **stroke treatments!**

DMT in **pre-clinical research** is **showing to be effective at helping neurons grow** and **make new connections**. Using a **sub-psychedelic dose** of **DMT**, **cortical neurons** when **exposed** to **DMT** showed **both neurogenesis** and **neuroplasticity!**

Neuroplasticity is the **making of new connections** and that's something that **brain cells need to do** especially when they're **undergoing repair** after an **injury**. Based on the **pre-clinical data**, **AGN** is hopeful that **DMT** will **help stroke patients** with their **recovery** causing their **neurons** to **create these new connections!**
